Easylabel License Information

EASYLABEL 7 can be licensed by a physical license dongle or a digital license. The various levels of EASYLABEL also use different license methods. This document help you choose which license option and method fit your needs.

License Options

License Dongle

- Physical dongle that connects to a USB port
- Same license dongle used by EASYLABEL 5 and 6
- Connected to the computer running EASYLABEL or acting as a license server
- Can easily be transferred to another computer

Digital License

- Does not require a physical dongle
- Ideal for laptops, virtual machines or any environment where a dongle might be lost
- Created for a specific computer running EASYLABEL or acting as a license server
- Moving / copying a virtual machine or booting a snapshot will invalidate its license
- Cannot be recovered if Windows does not load
- Can only be transferred by EASYLABEL support (additional fee applies)

License Methods

Single-User

- License is connected to the computer running EASYLABEL
- Available as SILVER, GOLD and PLATINUM levels
- No network connection required
- Will not run Windows Terminal Server

Multi-User

- One license is connected to the computer acting as the EASYLABEL license server
- EASYLABEL is installed on local computers and receives a license over the network from the license server
- Will not run Windows Terminal Server

Terminal Server

- Installs on a single Windows Terminal Server
- Clients log into the Terminal Server to use EASYLABEL
- Requires one license per server

Net Print Server

- Installs on a single computer acting as the web server
- Clients log into a website to select and print labels
- Clients cannot create or edit labels

Easylabel Level Information

EASYLABEL® FEATURES	START	SILVER	GOLD	PLATINUM	MULTI-USER	TERMINAL SERVER	NET PRINT SERVER
