# Creating a License File

A license file is needed for upgrading an existing license and for creating a digital license.

To create a license file you will use the EASYLABEL License Tool.

If you already installed EASYLABEL 7, you can open the software and select **"File" > "About" > "Check License Status"** to run the License Tool. The License Tool will guide you through the process of creating a license file.

If you do not have EASYLABEL 7 installed, you can download the EASYLABEL License Tool here:

www.easylabel.com/download/drivers/EASYLABEL-License-Tool.exe

For more information, please view the following information:
